

CyGOS™ Security Modules

See where others can't

IP-Surveillance Solution Utilizing Existing Industrial Electrical Infrastructure

Unmet needs in your Surveillance System?

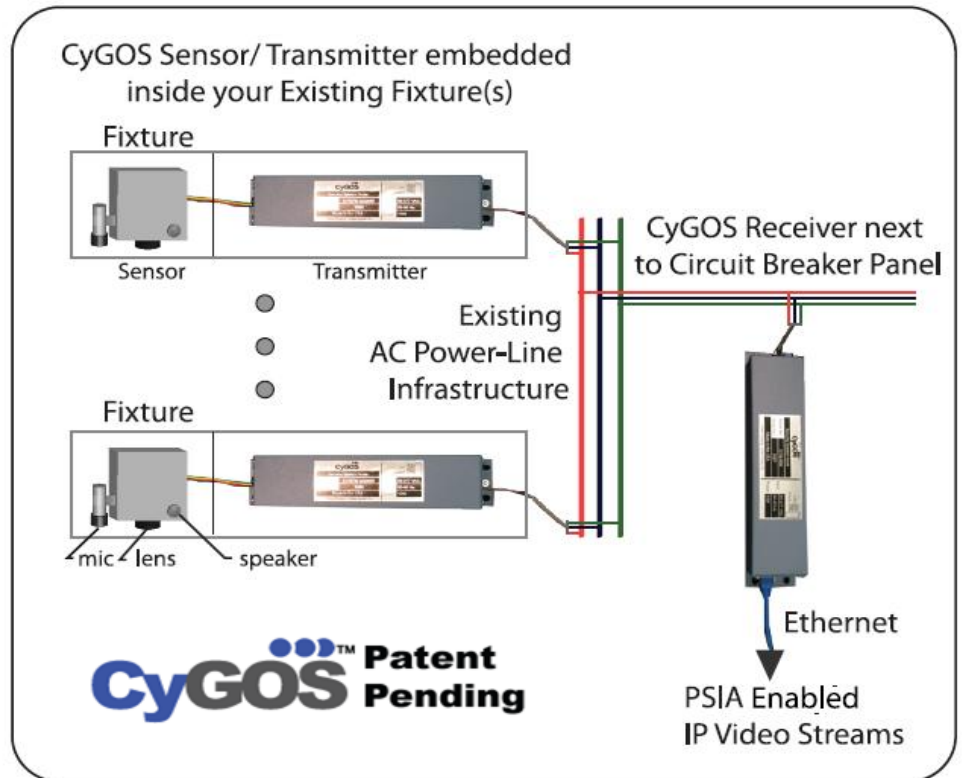

With CyGOS, you can extend an existing video and audio surveillance solutions suite into locations that until now have been difficult to monitor because of infrastructure constraints.

In places like:

Jail cells, psychiatric wards, suicide watch rooms, nurseries, parking garages and other hard to reach places.

The patent-pending CyGOS Security Modules are designed to enhance a current surveillance system with plug-n-play ease.

CyGOS Modules Typical Installation:

KEY BENEFITS: ● Zero Impact on Infrastructure ● Tamper Resistant ● Inconspicuous

Cyber Group, Inc. / Since 1998

CyGOS™ Security Modules

See where others can't

Details

EMBEDS NEATLY inside light fixtures and includes:

- IP Camera
- Built in IP video, 2-way communication system
- No need for new cabling or wiring
- Built in Level-3 routing
- 128-bit AES encryption
- H.264 video compression

ZERO IMPACT on infrastructure, since no modification to ceiling/walls is required

TAMPER RESISTANT since lens is difficult to access

INCOMSPICUOUS by leaving only a small footprint

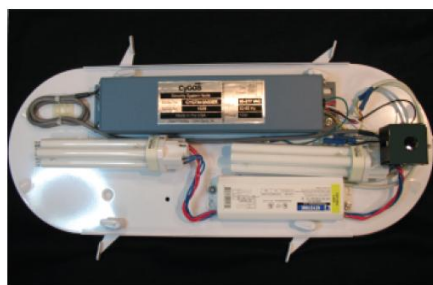

IT-FRIENDLY by easily enhancing existing surveillance installations

- Integrates easily into existing security systems
 - ❖ PSIA-Enabled to ensure interoperability
- Transmits data via AC power lines, eliminates network bandwidth consumption

STANDARD DEFINITION IP VIDEO; NTSC format, 720 x 480 px at 30 fps

Future Options:

- Edge recording (eliminates server storage needs)
- Microphone and speaker
- Video analytics

Enabled with Physical Security Interoperability Alliance standards ensure compatibility with other IP-based security devices.
