

Engineering Solutions for Software, Electronic Products and Systems

PRESS RELEASE

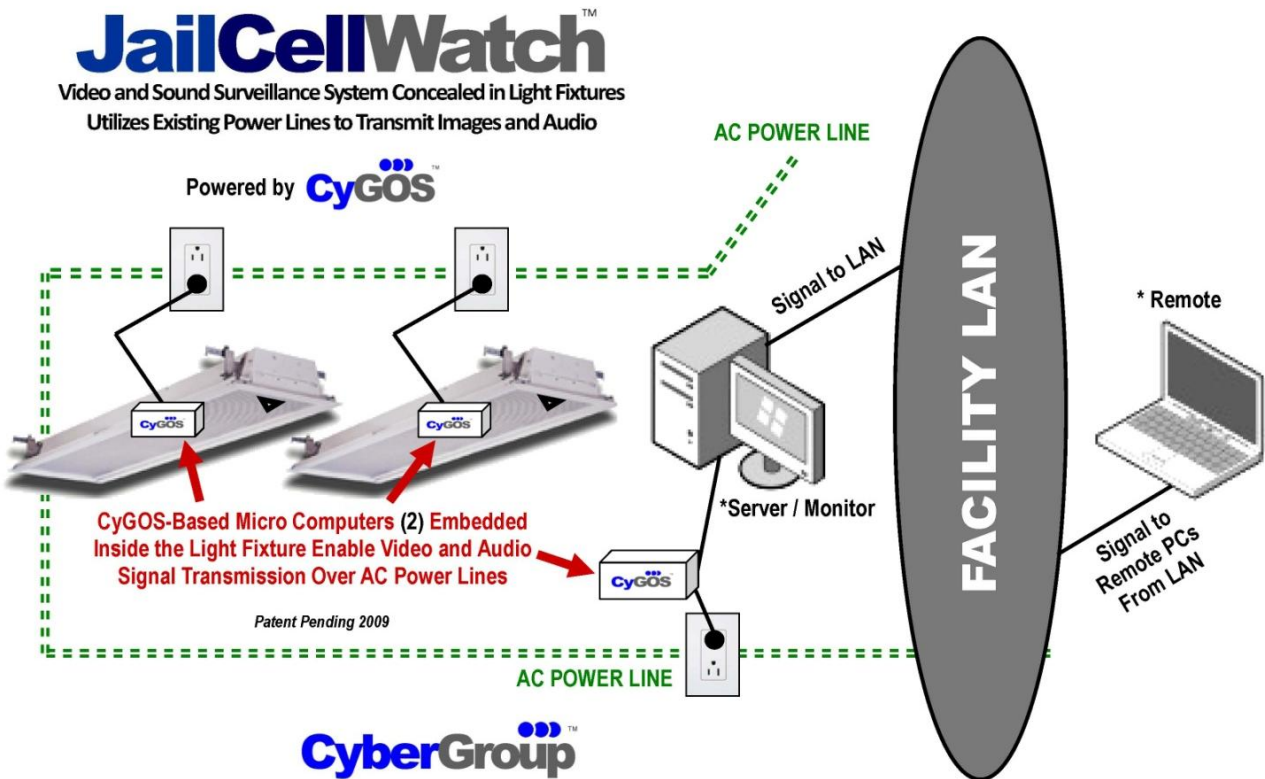

Cyber Group Exhibiting at 2009 Sheriffs' Association of Texas Conference

Featured Demonstrations of JailCellWatch™ Designed for Video/Audio Surveillance Inside Jail Cells
July 19th – 22nd in Booth Number 106.

(DALLAS, TEXAS – JULY 9, 2009) - Cyber Group, Inc. (www.CyberGroupUSA.com), a global provider of engineering solutions for software, electronic products and systems for public safety, energy, business and government applications, announced today that it will be exhibiting at the 2009 Sheriffs' Association of Texas conference July 19th through 22nd in Corpus Christi. Cyber Group will be in Booth Number 106.

Cyber Group will be featuring demonstrations of its JailCellWatch™ and audio surveillance inside jail cells. JailCellWatch™ What makes JailCellWatch™ is no installation of conventional ceiling or wall mounted cameras and no installation of extra cable up to and inside jail cells. It is built on the patent-pending CyGOS™ software platform that enables image and sound transmission over an AC power line. Depending on the agency requirements, video and audio surveillance can be covert or overt. JailCellWatch™ can be integrated with existing surveillance and access control systems.
