**CYBERGROUPUSA.COM Features New Software Engineering Services Offering**  
**Dallas-based High Tech Company Debuts New Web Site**

DALLAS, Texas/IMMEDIATE RELEASE—The new web site, [www.cybergroupusa.com](http://www.cybergroupusa.com), features the company's new software services offering, and details Cyber Group's engineering services solutions and integrated "near-shore/off-shore" strategic focus.

"The new web site conveys our leadership in providing both software engineering and embedded systems engineering services," said John Pillow, division vice president for Cyber Group. "We have created a site that is easy to use, and is packed with useful information for our visitors and customers."

Visitors exploring the new Web site will be able to review all Cyber Group engineering services offerings, and how Cyber Group works and delivers on customer projects, The site also provides information on the company's history, in-depth case studies and white papers related to the value of partnering with a technology and engineering services provider, and upcoming events and webcasts.

Dallas, Texas USA • Noida, U.P., India

Cyber group retained Jennings Development of Fort Worth, Texas for the design, architecting and development of the new site. According to Christine Jennings, principal in Jennings Development, “the new site makes use of the latest user-friendly and web-safe techniques for dramatically advancing Cyber Group’s customer oriented objectives. Cyber Group wanted visitors to explore for content to whatever level of detail satisfied the visitor. We believe the site achieves this goal because Cyber Group’s engineering services offerings called for a web presentation that was understandable, clear and appealing to many audiences among its targeted customers.”

Cyber Group, Inc. is a leading provider of complex problem solving engineering services, with operations and offices in Dallas, Texas and Noida, India. Its Software Engineering Services Division offers its customers a comprehensive, tightly coupled set of life-cycle software and system engineering services, including services to support software products and systems through all phases of their product life-cycles: maintenance, enhancement, re-engineering, code implementation and deployment. The Division offers particular expertise in maintenance, user-interface, scripting and re-engineering for applications that are stand-alone or built on web-based technologies and deployed with open source tools. Additional information can be found at [www.cybergroupusa.com](http://www.cybergroupusa.com).

Jennings Development, LLC is a skilled IT consulting company based in Fort Worth, Texas that specializes in creative web based applications, and development environment consulting & auditing services.
