**Sam K. Smith Joins Cyber Group, Inc. Board of Directors**

**Well known Dallas-based technology consultant and private investor adds his leadership to rising IT services company**

DALLAS, Texas, IMMEDIATE RELEASE – Cyber Group, Inc., leading provider of software and embedded systems engineering services, announced today the addition of Sam K. Smith to its Board of Directors. The appointment increases the number of Cyber Group directors to four.

In announcing Mr. Smith's appointment, Bhopi Dhall, President and CEO of the privately held company, commented, "With Sam Smith and Kanwal Rekhi now serving on our Board, we have two of the leading technology entrepreneurs and consultants intimately involved in working with Cyber Group. Together, their proven track records and understanding of the IT market will be invaluable to us as we advance our business based on our near-shore/off-shore strategy for delivering engineering services."

Mr. Smith serves on the boards of a number of technology companies. In accepting the appointment to Cyber Group's Board, he stated "When considering an opportunity to serve on the board of a company, the strength of the core team,

management's passion for the business, and a compelling market opportunity and business model are all key factors. Cyber Group has all three elements. I look forward to working with Bhopi and his team, and contributing to the growth and success of the business.”

Throughout his career at the senior executive level, Sam Smith has been at the forefront of the IT industry. In his long career at Texas Instruments, he held a number of key management positions, including Group Vice President of the Data Systems and Defense Systems Groups. Following his career at TI, he was Chairman of Landmark Graphics and a special limited partner at Sevin Rosen Management, a Texas based venture capital firm. Mr. Smith holds a Bachelor of Science degree in Electrical Engineering from the University of Oklahoma.

Cyber Group, Inc. is a leading provider of complex problem solving engineering services, with operations and offices in Dallas, Texas and Noida, India. Cyber Group provides world-class life-cycle software engineering and embedded electronic systems development and engineering services.
